# Incremental Framing Strategies

## Limited Budget

You have a limited budget for this design.  
Keep your idea within a tight budget.

## Meet Constraints

Focus on a key constraint of the problem and  
be sure to follow it.

## Already Existing

Think about a common solution that already  
exists and build on that.

## Simple

Sometimes the best solutions are the ones that  
are most easily understood. Keep your solution  
simple.

## Short Term

Come up with a solution that can be  
implemented quickly. (i.e. within the next week  
to a month)

## Current Technology

Generate a solution that only uses technology  
that currently exists.
